

C-Leg[®] Protector

Quality for life

C-Leg® Protector

Security and Protection

Indispensable Protection for Active People

Protection in everyday life and for extraordinary situations: The C-Leg® Protector is the perfect accessory for C-Leg® or C-Leg®compact wearers who are actively involved in life and like to take on challenges. Its special coating protects the knee joint from bumps and scratches, and even lets you kneel down – easily and comfortably – without sliding it out of the way. The C-Leg® Protector is an innovative breakthrough in form and function, keeping you a step ahead and looking good at the same time.

Your orthopaedic technician will customize the Protector to fit your C-Leg® or C-Leg®compact. Once it's been customized and you need to clean the Protector, it's easy to remove and replace it.

Attractive Accessory

The C-Leg® Protector is a must for those fashion conscious C-Leg® and C-Leg®compact wearers who want to show off their leg in public. The elegant design encloses the knee joint and tube adapter with an attractive, plastic cover while also protecting them from the elements. The Protector even creates natural contours in the calf area without compromising the function of the knee joint.

The C-Leg® Protector combines form and function to create real protection for the knee joint.

In addition to the C-Leg®, it is now also available for the C-Leg®compact. The C-Leg® Protector is easy to put on and take off, and is available in the colours silver and blue.

For further information on the C-Leg® Protector, please contact your medical supply store or Otto Bock HealthCare at www.ottobock.com.
